

bitTorrent causing blue Screen

Escrito por faelanstevie - 07/03/2018 13:01

Hi,

BitTorrent causing blue Screen on different times:

some time I got the blue screen after 1 min

some time I got the blue screen after 10 mins

some time I got the blue screen after 30 mins

while if the program opened without downloading it never causes blue screen. I have doubt that the issue is from the wireless card, so I updated it to the latest available driver and it's the same.

also I downgraded it from 7.7.2 to 7.7.0 and it's the same?

Please help.

I didn't find the right solution from the Internet.
