

Boosting GDP/Decreasing Uncompetitive Economy?

Escrito por MichaelSmith - 14/05/2018 06:48

Hey there,

I've been trying to run Germany, the USA, and just now the UK and I'm seeing a similar pattern with all the countries: while education and health are going up, I can't seem to boost the GDP and decrease unemployment. I also can't help but to piss off the capitalists because if I don't tax enough, I rack up an even bigger deficit which only has a negative effect on my credit rating + GDP overall. Anyone have any tips on how to neutralise this problem without becoming a total capitalist wh*re?

Please help

I didn't find the right solution from the internet.
