Graphics Card Problem
Escrito por kevinmanuel - 19/03/2018 08:16

_____

HI,

i can't work with sketchup with my new graphics card anymore.. I had NVDIA 6500 GT. And it worked really good with. But now with 8600 GT which you may think would perform better, i'm having messed up graphics, freezing issues etc.. I have the latest drivers. How may i fix this?

please help

I did not find the right solution from the internet.
